## Baseboard Heaters

Baseboard heating is a fast, easy and economical way to heat a small area. This is a great heating option if you only need to warm one room or area. With a slim, baseboard design, these units require little space and can be conveniently used in bedrooms, living rooms, an office or even your garage.

Baseboard heaters are a reliable heating source. An adjustable thermostat provides energy-efficient operation and allows you to adjust the heat to your comfort level.

### Advantages of a Baseboard Heater

- Economical
- Clean and quiet
- No duct work or special wiring is required
- Easy installation
- Great for heating a room only when needed

Baseboard heaters also qualify for MVEC's Energy Wise® Program. This great program is guaranteed to save you money by offering you a reduced electric rate. In addition, receive a special rebate when this product is installed to an Energy Wise® meter. For more details, please contact a member service representative.
