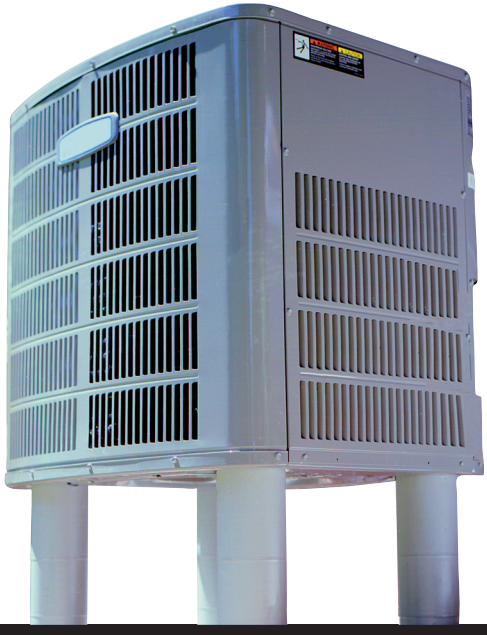
# Get ready for cooling season!

## (And be ahead of the game for the heating season later)

An Air Source Heat Pump cools like an air conditioner, plus it heats more efficiently than your furnace in the spring and fall. It pays for itself!

**Get a $500 rebate and pay half price electric rates with Energy Wise!**



**Call Mike O or Michael H at 952-492-2313 or 800-282-6832**

Just one phone call! We'll hire the contractor for you. Easy financing options available through MVEC.

# Tree trimming improves safety and reliability

**Stay Safe!** Never attempt to trim branches near electrical wires or remove branches that touch power lines. Only qualified tree contractors should trim trees growing near power lines.

**MVEC is responsible** for trimming trees that are in contact or have the potential to cause an outage on primary electric lines. Your cooperative trims trees on a rotating cycle and during emergency situations for electric safety and reliability.

**Members are responsible** for maintaining trees and vegetation around secondary lines and outside of MVEC's easements. When MVEC trims your trees, the homeowner is generally responsible for clean-up, especially during storm situations.
