

# Position Description

# MVEC

MINNESOTA VALLEY ELECTRIC COOPERATIVE

A Touchstone Energy® Cooperative 

## Energy Systems Internship

MVEC is seeking an individual who is interested in energy systems for a summer internship helping MVEC build an efficient economy powered by a clean & modern electrical grid.

The successful candidate will need to be enrolled full-time in a university or college studying engineering/business/public policy with a focus on energy or power systems or an energy and climate related program and should be in their junior or senior year of schooling.

### Job responsibilities:

- Analyze and test new energy technologies for homes and business such as heat pumps, electric vehicles, energy storage and renewables.
- Engage homes and business on their energy use and adoption of energy technologies.
- Research technologies to modernize the electrical grid.
- Support creation of energy programs.
- Assess energy policy.

### Intern skills:

- Strong interest in modernizing the electrical grid and developing new technologies and programs to make homes & business more efficient
- Desire to learn energy systems and policy
- Flexible work schedule in an Indoor and Outdoor environment
- Ability to take direction and initiative, work independently, and multi-task
- Excellent verbal and written communication skills
- Eager to learn and grow your professional skills in a casual work setting
- Able to supply letter of recommendation from advisor or professor within the college department of your major

**Hours:** Monday through Friday 8am – 4:30pm

**Start/End Dates:** Mid-May through Mid-August
