Cooperative Membership

MVEC has provided safe and reliable elec-

tricity at cost. Over the past 86 years, system growth, new technologies, member choice with product and service offerings and rate options have made MVEC a leading energy provider you have come to trust. Here is why:

Cooperative governance. MVEC is governed by a member-elected board of directors guided by members, just like you, that include representation across our ninecounty service area. The boards' role is to listen, learn and share member perspectives that help them set priorities for the co-op and guide future decisions.

Open participation. Tuesday, March 28, MVEC will host its 86th Annual Meeting to its members. This is your chance to actively participate in the business of the cooperative. During the meeting, we share updates on the past year's accomplishments, a 2022 financial review, scholarship winners and director election results.

Members have a voice. Hearing your thoughts on our community's energy future is important. There are many things happening in the energy industry from affordability and program options, to legislation, reliability initiatives and distribution methods, to technology enhancements and much more. Member needs and changing technology impact nearly every aspect of how we manage and deliver energy to the local community.

Service-focused and not-for-profit operations. All revenue received, beyond costs for providing electric service, remain the property of MVEC members. The cooperative focus is to not earn profits but rather return them back to our members - YOU! Funds that are returned are called Capital Credits and represents each members' ownership of the cooperative.

Motivated to serve local communities.

Electric cooperatives are built and belong to the communities they serve and are uniquely suited to meet local needs. The communities surrounding us are important and vital to our success. Being a community steward and partner is both a great value to and for us.

Key values members can count on. Our core purpose and mission is to provide safe, reliable and affordable power that positively supports everyday life for towns, businesses, and communities alike. With that in mind, MVEC is focused on these four values:

- Innovation: Meeting and exceeding the needs and expectations of our members.
- Community: Working to improve the quality of life in our communities.
- Accountability: MVEC belongs to the members it serves.
- Integrity: Members are first, every day.

You will learn more about the impacts of each of these values on the inside of this annual report.

We look forward to visiting with you at the annual meeting on March 28 at Jordan High School.

Pooperatively yours,

Brent Lawrence, President **MVEC Board of Directors**

- \$1.08M road moves
- \$1.7M substation upgrades
- \$.87M new construction
- \$11.7M general upgrades

ConstructionWORK PLAN

\$15 MILLION *Staff achieved a Corporate Goal by completing the 2022 work plan 10% under budget with no associated outages.

College intern program

MVEC recruited four interns last summer. This is a win-win solution for interns and the co-op as students work on meaningful projects that have a positive impact on MVEC and its members.

A case in point is a **Drone & Field Equipment Inventory Optimization Project** conducted by the GIS (Geographic Information System) intern.

Drone Benefits:

- Offers increased safety on high level inspection processes with aerial views of MVEC's service area and equipment
- Can help decrease the number of outages and their duration
- Helps monitor vegetation management (tree contacts with equipment)

Continued cooperative growth

In November, the Public Utilities Commission approved a customer/member transfer with MVEC gaining 788 Shakopee customers, and Shakopee receiving 251 MVEC members. With a total of 1,590 new services in 2022, MVEC membership is at 46,398.

High satisfaction ratings

25% growth in four years! SmartHub's FREE capabilities include account management, bill payment, usage monitoring, texting and more! 30,668 Smarthub users in 2022!

Wi-Fi Thermostats (879 installations) **Electric Vehicle Chargers** (149 installations) had a record year in 2022. Wi-Fi Thermostats = a \$50 rebate and 10% off summer electric bills. EV chargers = \$150 rebate and

flexible Time of Use rates.

For 2022, MVEC received an American Customer Service Index score of 87 out of a maximum score of 100. MVEC's score is higher than all 2022 investor-owned utility scores and places MVEC 15 points higher than the average investor-owned utility scores of 72, as well as 14 points higher than the municipal utilities score of 73, per the industry ratings in the 2022 ACSI Utility Sector Report.

> March 6, 1937, when the Carver, Le Sueur, and Scott county electric organizations banded together to incorporate as Minnesota Valley Electric Cooperative, our focus has been on providing safe, reliable power at cost. Now 46,000+ strong and in 9 counties, our purpose remains

Serving members for 86 years!

An extensive cost-of-service study, conducted by an outside consultant, determined MVEC's Basic Monthly Service Charge should change from \$10 to \$15 to cover the cooperative's costs while ensuring reliable power to the membership while remaining competitive with neighboring utilities. The study indicated a need to implement rate changes to both residential and commercial members in 2023, based on the increases of costs in the energy industry. As a not-for-profit utility, we pledge to safely provide reliable energy at cost. Our web page called "Energy Costs and You" shows the thought process behind determining rates, ways to save, and other energy issues we are facing.
