

Considering renewable energy? Call MVEC first.

1. Do your research BEFORE investing. Installing a renewable energy source involves a contractor, electrical codes, safety codes, permits, and as your utility, permission to hook up to the electrical grid.

2. MVEC requirements are available in the NOVA Power Portal at www.mvec.net/green-energy-options/

Then contact us regarding any renewable energy project at dginfo@mvec.net or 952.492.2313

3. **Be aware of door-to-door contractors**, who may mention they are working on behalf of MVEC. While MVEC can point you to a list of reputable vendors, we never endorse a sole contractor as there is no one-size-fits-all solution for our members' needs.
