HARVEST SAFETY

Electrical Safety Tips for Harvest Season!

- Keep at least **10 feet of clearance** around all utility equipment in every direction.
- Use a **spotter and flags** to help guide large equipment near power lines.
- **Plan your route** before moving tall machinery or raising augers and grain truck beds.
- **Stay put** if equipment contact occurs with a power line. Call 911 and remain inside until the power is shut off. Exit only if there's fire or smoke. Jump clear with feet together, then hop away.

Goodbye Cold, Hello Comfort!

Make your garage or man-cave a year-round workshop, hangout, or home gym. An **electric garage heater** keeps you warm, productive, and enjoying your space all winter.

Electric garage heaters are:

- **Efficient** - Heats when and where you need it
- **Safe** - No fumes, flames, or fuel storage
- **Affordable** - Receive a \$50 rebate and a lower Energy Wise electric rate

Electric garage heaters are sold online at MVEC's Energy Store! Scan QR code or visit:
