

Happy Co-op Month!

Hey, look at this! Since we get our power from MVEC, it says we're actually member-owners of the cooperative!

Wait, we own the power company?

Does that mean unlimited power? First up: absolute control of "my" thermostat.

Easy there, Sparky. It means member-owners get a voice and a vote.

That's what makes a co-op different. It belongs to the people who count on it.

Got it. With great power comes great responsibility... and I vote for ice cream!

The humans own the co-op. I own the humans.
